Rotary Phase Converter

Our quality in building a phase converter panel is nothing like you can find on the market today. We take pride in building the best phase converters you can buy delivering 100% precision balanced power.

- Voltage Precision Balanced with Volt Meter Display
- Soft Starting
- Digitally Protected
- Overload Protection
- Custom Corrosion Resistant
- Totally-Enclosed and Fan-Cooled
- Cast Iron Generator

Phase Converter Panel:

Not a single phase converter leaves our facility, unless it is absolutely perfect! No crossed wires, secure tied downs, all hand built and passing a four level inspection process before it is packaged and shipped.

- Heavy Gauge Copper Wires
- Resistant to Heat and Moisture
- Custom Steel/Powdered Coated Enclosure also available in NEMA 3R Outdoor Design
- Oiled Filled Capacitors
- Zinc-plated Power Distribution Block
- Built-in Magnetic Starter and Start/Stop Station
- Voltage Meter Display
- Power Failure and Overload Protection
- Power Factor Correction

Generator/Idler Motor

Totally enclosed and fan cooled, our generators are made to preform in a wide range of environments designed to keep out dust, wood, metal, rodents, insects, and extreme weather conditions.

- Cast Iron Frame
- Corrosion Resistant Hardware
- Stainless Steel Connection Plate
- Cast Iron Conduit Box
- Over Sized Bearings
- Cast Iron Inner & Outer Bearing Retainers
- Vacuum Impregnated Windings
- 4140 Steel Shaft Rotor
